Supporting positive clinical outcomes

Hospital and patient care product offering

ThermoFisher
SCIENTIFIC

Positively impacting the health of your patients and your organisation

Thermo Fisher Scientific's extensive range of healthcare, clinical and diagnostic solutions include a full range of supplies for hospitals, clinical laboratories, reference laboratories and physician's offices. Through our comprehensive product offering, e-commerce capabilities, integrated global logistics network, supply chain and manufacturing facilities, we provide a broad range of products to support healthcare providers in Australia and New Zealand.

Expertise

Shared experience supports your goals and enables you to effectively utilise our solutions

Support

We understand the challenges you face and the complexities of patient care; our team is here to help find the answers you need

Trust

To support your evolving needs, we offer an extensive portfolio of trusted products

Collaboration

We collaborate with you as partners to drive discovery and engage in interactions as an extended part of your team

Surgical and operating room

Whether preparing the operating room, organising the patient for surgery, preparing the instrument table, establishing the sterile field or managing waste, we have the products you are looking for. Thermo Fisher Scientific offers a wide range of operating room consumables that meet the high standards of quality and performance required to enable safe surgical procedures.

- Single use instruments
- Sharps safety products
- Surgical garments (operating theatre gowns, face masks, headwear, shoe covers)
- Standardised procedure packs
- Patient drapes
- Equipment covers
- Light handle covers
- Blades and scalpels
- Patient preparation products
- Patient positioning and injury prevention
- Skin preparations and marking
- Suction management
- Waste management

Custom procedure packs

Our locally manufactured Promed® Custom Procedure Packs offer you a customised solution designed to reduce waste, reduce procedural set up time, and offer improved clinical patient outcomes.

Brand options for the custom pack components are extensive — individual components can include drapes and gowns, absorbency and fluid management, single use instruments, suction tubing, products for infection prevention and much more.

- Collaborative approach to the design of your packs
- Fast, controlled and efficient changes to pack recipes
- Education programs to assist with the integration of new packs into your processes

Infection control and sterilisation

Effective infection control is essential to providing high quality healthcare for patients and a safe working environment for healthcare professionals. Our range of infection control products meets the needs of professional work practices in the dynamic healthcare community and national health policy.

- Decontamination products
 - Swabs (patient and device)
 - Hand sanitisers
 - Disinfectants (alcohol, sporicidal)
- Sterilisation products (CSSD)
 - Automatic, manual and remedial cleaning chemicals
 - Instrument cleaning and protection products
 - Sterilisation wraps and laminates
 - Bags, liners, indicators and tape
 - Heat sealers
 - Stainless steel trays
 - Plasticware (instrument trays, cases, bowls, tags, kidney dishes)
 - Testing kits
 - I.D tapes and tags
 - Instrument guards
- Medical/hospital waste management solutions
- Autoclaves
- Water purification systems

Clinical consumables

Our clinical consumables portfolio offers a comprehensive range of products and solutions supported by clinicians with expertise in key clinical environments. Designed for high and low risk clinical settings, our range covers a broad spectrum of superior quality, easy to use and reliable products.

- Critical care
 - Enteral feeding
 - Oxygen therapy and airway management
- Diagnostic imaging
 - Portable ultrasound devices*
 - Ultrasound consumables
 - Radiology consumables
- Clinical apparel
- Patient care
 - Dressings and IV
 - Hot/cold therapy
 - Patient wipes (hands, face, body)
 - Skin preparation swabs
 - Patient protection products
 - Temperature monitoring
 - Syringes
 - Food services/storage

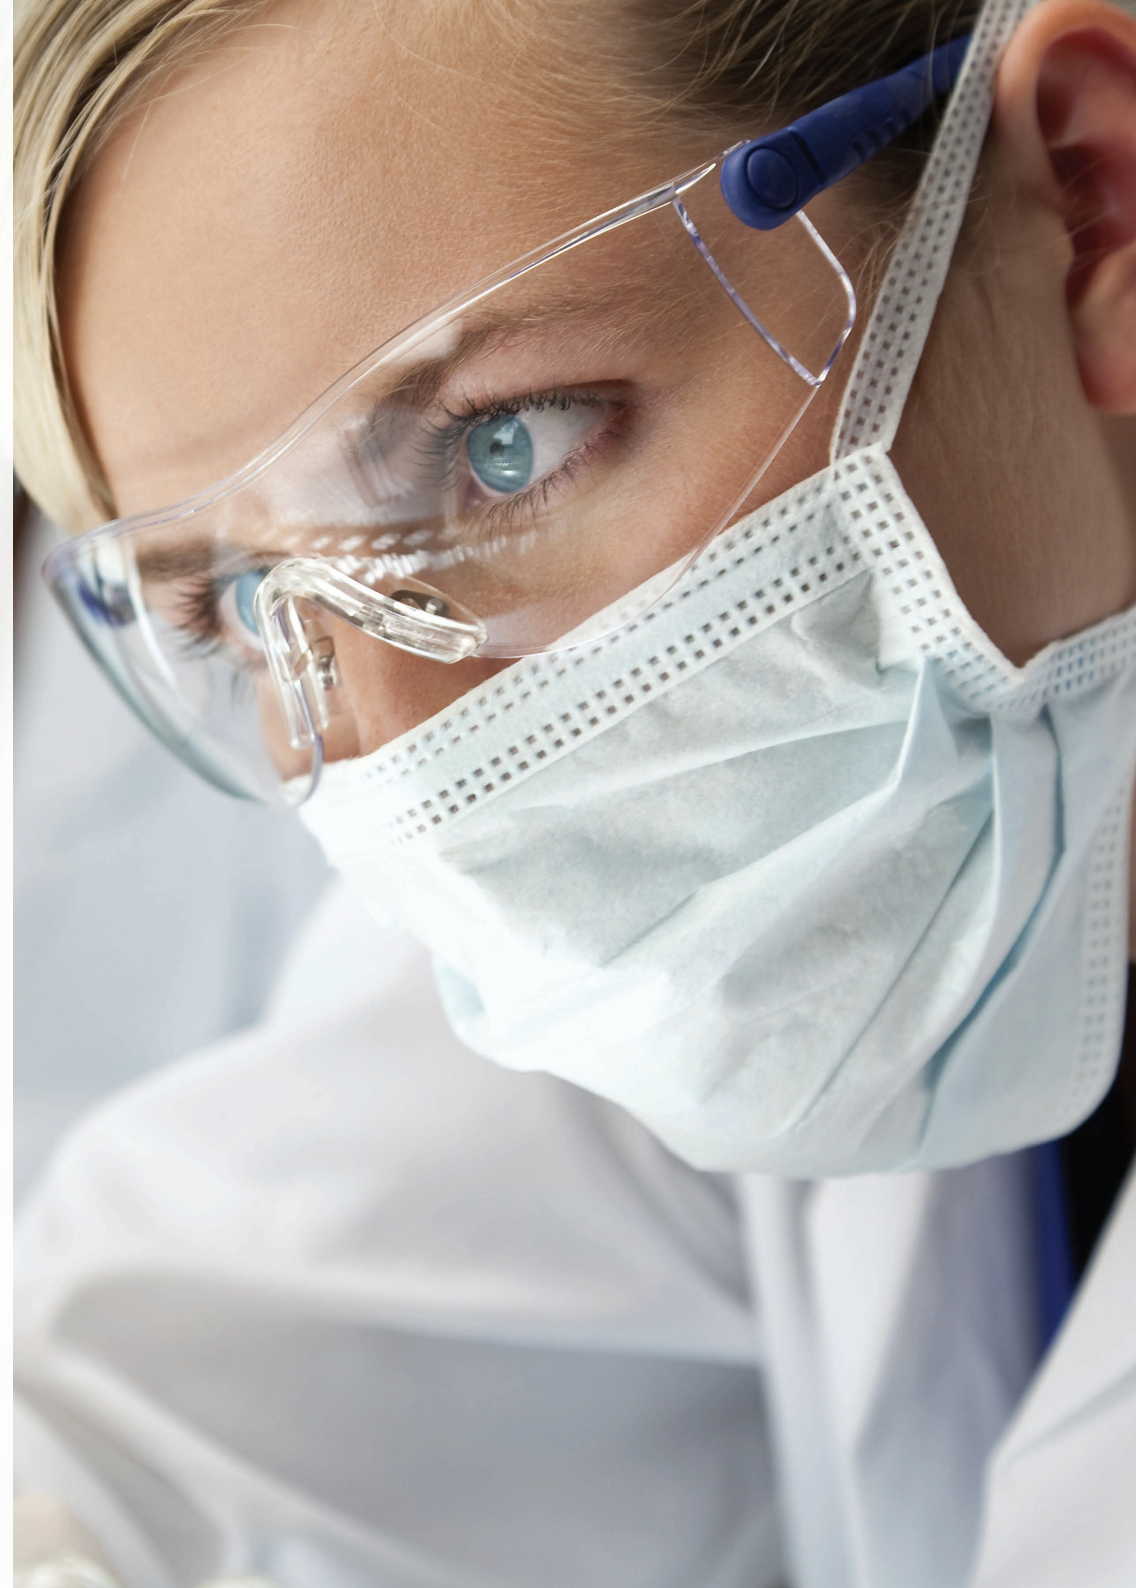

* Available in Australia only

Pathology and laboratory

As a market leader in diagnostics and scientific research, we have an extensive range of consumables, reagents, chemicals and instrumentation for pathology testing and laboratories.

- Anatomical pathology
- Clinical microbiology
- Diagnostic testing
- Reproductive health
- Laboratory equipment
- Analytical instruments
- Laboratory consumables
- Chemicals and solvents
- Compounding pharmacy and cleanroom consumables
- Biobanking instruments, sample management and consumables

Safety solutions

Our extensive range of safety products ensure patient and worker safety whether they are in the ward, the lab or in the field.

- Biohazard waste containers
- Environmental monitoring
 - Air (microbial and particulate)
 - Room gas monitoring
 - Water testing solutions
- Gloves (surgical, examination, cleanroom, laboratory)
- Lone worker devices
 - Emergency response and employee check-in
 - Fall and movement monitors
 - GPS, satellite and cellular location monitoring
- Personal protection equipment (PPE)
 - Apparel
 - Eye and face protection
 - Hand protection
 - Respiratory protection
 - Splash guards
- Sharps safety
- Specimen shipping and transport
- Spill Kits (biological and chemical)

Service and calibration

Depend on us for peace-of-mind expertise, increased uptime and continuity of operations — customised to your organisation without budget surprises.

Our technical service team is equipped with the global knowledge and tools to support you when instruments require repair, service and calibration.

Preventative maintenance

Be confident that your instruments will continually operate at optimum efficiency with preventative and proactive maintenance by our expert engineers.

Breakdown service

Our factory trained and certified field and depot engineers service equipment to the highest quality standards, making certain they complete repairs to meet local and internationally recognised standards.

NATA/IANZ certified calibrations

Thermo Fisher Scientific recognises your instruments are valuable assets that are an integral part of your daily operations, our NATA/IANZ accredited laboratories can ensure that these instruments are working in accordance with manufacturers' specifications.
